

My beloved Portia died of breast cancer in 2007. Notwithstanding her illness and early departure, Portia did enjoy a blessed life on earth and had the privilege of tremendous support and care from her family and friends in times of difficulties and trials. It is both her wish before her departure and ours that more care and support can be given to those less resourceful breast cancer patients to help them maintain a good quality of life with dignity during the trying period.

As Government will not provide free PET-CT Scan service to needy patients for staging of cancer, the Programme has recently expanded its scope to also sponsor needy breast cancer patients in public hospitals to have timely PET-scan service in private clinic so that they can receive the most appropriate treatment. By December 2023, the Programme has donated more than HK\$6.5 million to subsidise over 1,030 needy breast cancer patients for undergoing PET-CT Scan and purchasing extra nourishment, breast prosthesis and drugs which currently are not funded by the Government or other sources.

The donation to the Programme will be earmarked for direct subsidy to needy breast cancer patients, and every dollar received will be given direct to the patients without any administrative or other costs.
